TO DISCUSS YOUR REQUIREMENTS.

REGULAR AND REQUESTED MAINTENANCE
SERVICES FOR ALL BULK-HANDLING SYSTEMS

MAINTENANCE

For regular servicing, our maintenance specialists will visit your site to evaluate your specific plant requirements and devise a routine maintenance package to suit your needs. Our engineers can service and maintain all bulk-handling systems, whether or not they were manufactured by Spirotech Group Ltd. Planned maintenance programmes can include load cell calibration, local exhaust ventilation (LEV) testing, system overhauls and process overhauls. Such regular servicing helps to keep your plant running efficiently and enables us to identify any potential issues before they cause a problem.

Before

After

SERVICING BY REQUEST

In addition to planned maintenance contracts, we can also carry out unscheduled site maintenance tasks on request.

Call us on +44 (0)1904 799 291 for more details.

RESPONSIVE REPAIRS SERVICE

REPAIRS

As well as maintenance work, our engineers offer a 24-hour repair service, to keep your systems up and running at all times. We undertake repairs to all conveying equipment, silos, dischargers and all associated material-handling systems. We can provide all necessary risk assessments and method statements, facilitating a swift response to any breakdown or incident – and ensuring minimal downtime of your plant.

ACCREDITED ENGINEERS

All repair and maintenance work is carried out by ECITB (Engineering Construction Industry Training Board) accredited service and maintenance engineers.

Call us on +44 (0)1904 799 291 for more details.

COMPREHENSIVE RANGE OF SPARE PARTS
AT COMPETITIVE PRICES

SPARES

We can provide critical spare parts for every element of your bulk-handling system, from control and instrumentation components to silo filters and discharge systems, conveying, mixing and weighing equipment. Our buying power as a large bulk-handling system manufacturer enables us to offer spare parts at very competitive prices, giving you a cost-effective source of essential components for your plant.

NEXT-DAY DELIVERY FOR CRITICAL COMPONENTS

We can provide many vital spare parts on a guaranteed next-day delivery service, helping to minimise any downtime at your plant. As well as providing direct replacements for broken or worn-out parts, we can supply the most up-to-date parts to replace outdated or obsolete items. Our experienced team can assess your requirements, and ensure you are supplied with the best replacement parts available.

UPGRADES

PLANT UPGRADE SERVICE

When you need to update parts of your plant, retrofit new and improved components or introduce new automation systems, Spirotech Group Ltd offers a comprehensive plant upgrade service to ensure all work is carried out to the highest standards. By updating and modifying your plant as required you can ensure it maintains productivity at optimum levels, without the need to invest in new bulk-handling systems.

Our plant upgrade service is supported by our in-house design and manufacturing expertise, ensuring all retrofitted components are fully compatible with your plant and provide the highest performance levels. We can carry out modifications to adapt your plant to changing operational requirements or to help you comply with new legislation. All work is carried out efficiently and effectively by accredited and highly experience engineers, with minimal disruption to your plant. We can also upgrade your plant to operate using SCADA-based remote control and monitoring systems.

Our in-house designers will assess your system and develop a solution to meet your ongoing requirements – whether you need a simple control upgrade or a completely new automation package.

GROUND LEVEL SILO SAFETY SYSTEM

Our GLT system will ensure your silo and environment is kept safe at all times during tanker filling. Reducing the need for climbing to roof level to check operation of pressure relief valves, level probes and pressure monitors.

Call us on +44 (0)1904 799 291 for more details.

INSTALLATION

QUALIFIED AND EXPERIENCED

Every Spirotech Group Ltd storage and handling system is installed on site by an experienced team. Our engineers are accustomed to working on busy, hazardous and sensitive sites, and follow the strictest health and safety procedures and industry-specific working practices.

Our installation engineers all hold CITB passports and, where required, your installation will be carried out in line with CDM regulations. As part of our turn-key service, Spirotech can fulfil the role of principal contractor, bringing together and co-ordinating all aspects of the installation, including areas not covered within our contract. We carry out full project planning and programming and take responsibility for all specialist sub-contract management.

HIGHEST STANDARDS

A dedicated site supervisor is allocated to each installation to ensure all programme duties are fulfilled to the highest standards. Specialists are appointed for all lifting operations, slinger banksman duties and welding.

We adhere to the strictest safety standards on site, delivering an efficient installation, programmed to cause minimal disruption to your operations.
